

## DESCRIPTION

# Fondaco Multi-Asset Income

## Multi-asset class Fund of funds

AIF under Italian law. The aim of the Fund is to realize absolute profit through dynamic exposure to different asset classes, mainly investing in Italian and foreign OICR shares.

## INVESTMENT STRATEGIES

## STRUCTURE OF THE FUND AND TERMS

<b>Target yield</b>	<b>Benchmark (60% FTSE World Gov Bonds Index Eur, 25% MSCI World, 15% Barclays Global Agg Corporate) over a medium-term period (3 years)</b>
<b>Expected volatility</b>	4-6% per year
<b>Management strategy</b>	Flexible
<b>Assogestioni classification</b>	Flexible Funds

The Fund operates a flexible management strategy, offering dynamic exposure to risk factors and different yields: the weight of the equity component must be between 15%-35% and benchmark equal to 25%, the weight of government bonds between 50%-70% and benchmark equal to 60%, the exposure of corporate bonds between 10%-20% and benchmark equal to 15%. The investment process of the Fund combines quantitative elements, thanks to the medium-term strategic allocation, and qualitative elements, based on the fundamentals and the evaluations of various markets and investable instruments. Finally, the implementation of investments is carried out by selecting the best manager in the world and active, systematic or passive strategies, identifying the most suitable solutions in order to create value and offer a wide diversification in the various management companies. The investment process includes an active and decisive role of the Risk Management Function: the monitoring of the profile risk / daily return is focused on the relative deviations from the benchmark (Relative Conditional Value at Risk, Tracking Error Volatility both ex-ante and ex-post contributions to the performance attribution) and the degree of liquidity of the portfolio.

## FIA under Italian law reserved for Italian Banking Foundations, their instrumental bodies and other institutional clients
